# **Integrating MuleSoft with Authomize**

Integration with MuleSoft provides visibility about the identities and assets on your organization's MuleSoft account. After integration, Authomize provides visibility into MuleSoft, enabling improved identity security and automated access reviews.

# **MuleSoft integration workflow**

### Set up Authomize in MuleSoft

- 1. Log into MuleSoft.
- 2. Go to Access Management or enter https://anypoint.mulesoft.com/accounts/.

© Design Center Get started creating Mule applications and APIs. Create visual flows, and build, test, and reuse API specifications and fragments. Start designing	<ul> <li>DataGraph</li> <li>Unify many APIs into a single graph of data, and consume exactly the data you need in a single request.</li> <li>Unify &amp; consume</li> </ul>
Cutorials     Constraints     Constraint	<ul> <li>Management Center</li> <li>Access Management Manage users, business groups, and audit logs. →</li> </ul>
~	● API Manager Manage clients, policies, SLAs, traffic, and alerts.

3. On the Organization page click Authomize to open the Organization Info Dialog.

🚍 🔅 Access Management					
ACCESS MANAGEMENT	Organization				
Users	Name	Owner			
Roles Environments	+ Authomize	Roi Noostaan			

MuleSoft Integration Guide - 25 December 2022

4. In the Organization Info Dialog, copy the Organization ID.

Organization	Organization info	×
Authomize	Organization name * Authomize Organization domain * authomize	
	Owner *	×
	Organization Id	
	Client Secret	
		Show

5. Click Connected Apps in the main menu. In the **Connected Apps** dialog click Create app.
