

# Integrating Authomize with Authomize

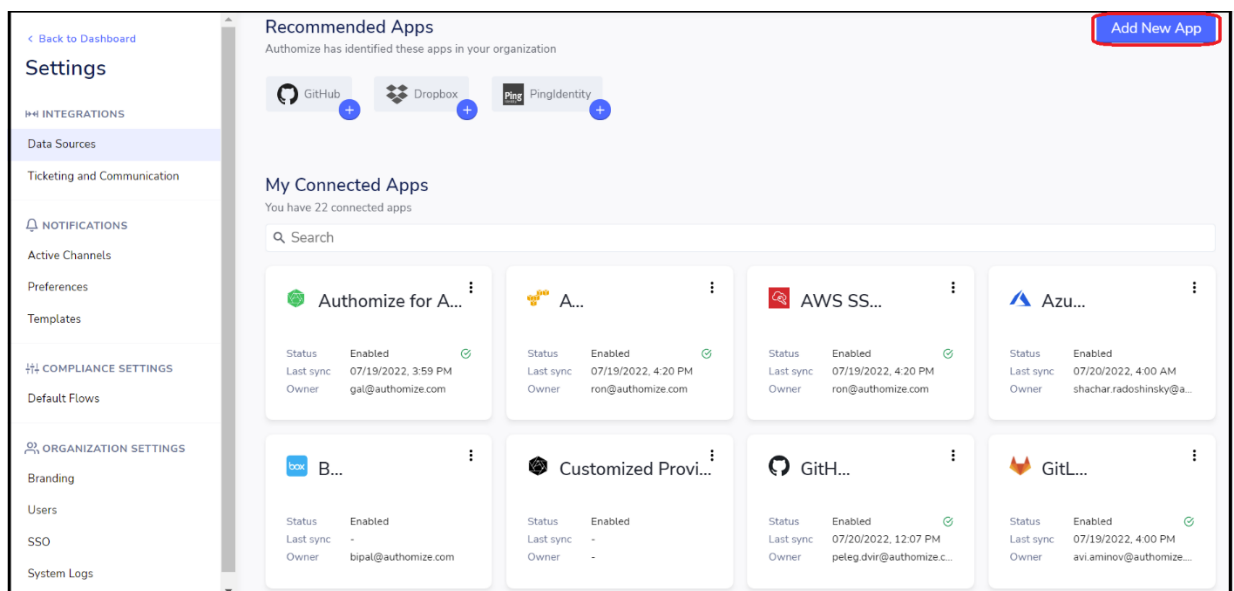

Authomize can be integrated with itself so its users and administrators (including admins who are listed directly in Authomize, and admins who have an admin role or are part of a group with admin privileges) can be monitored in access review campaigns for compliance purposes and better security.

## Authomize for Authomize integration workflow

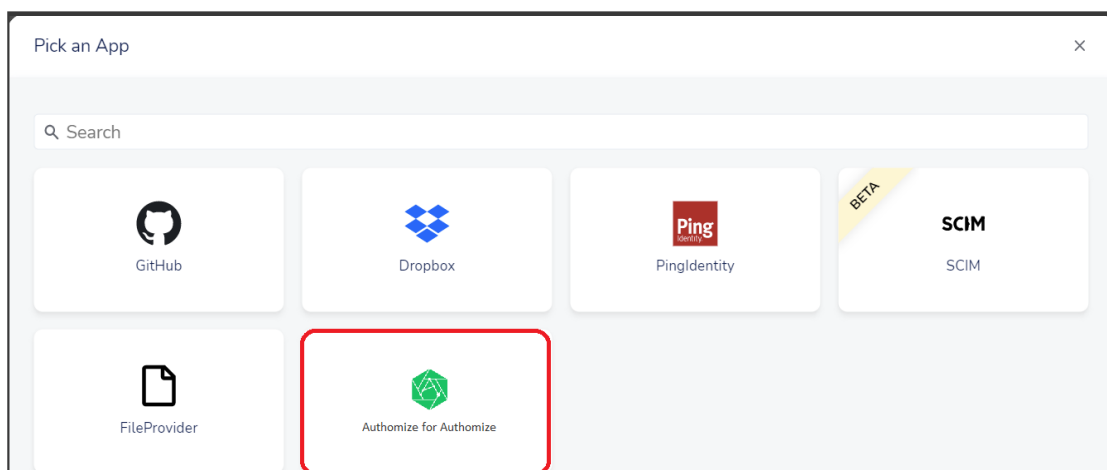

## Installation

1. Go to Settings/Data Sources and check to see if Slack was already installed. If not, click **Add New App**.

2. Click Authomize for Authomize

3. In the Integrate Authomize with Authomize dialog:
  - enter an integration name
  - enter the email of the integration owner
